

# DEALER'S QUARTERLY NEWSLETTER

Volume 1 / Issue 1

## LATEST RELEASE

### *Checkout Station*

The COS is the latest product released from the HIT-NOT Proximity Detection Team. It is a quick, simple way to ensure your HIT-NOT Personal Alarm Device (PAD) is fully functional before use.

Just drop the PAD in the holder and in less than 10 seconds the COS will verify that the PAD is working properly.

Integrated Checkout Station  
Model Number: HN-ICS

## DEALER TRAINING

HIT-NOT is currently offering training for dealers at no cost at our Huntsville, Alabama facility. The two-day course includes comprehensive hands-on training, instructions for the installation and maintenance of HIT-NOT equipment, live demonstrations and a tour of the manufacturing facility.

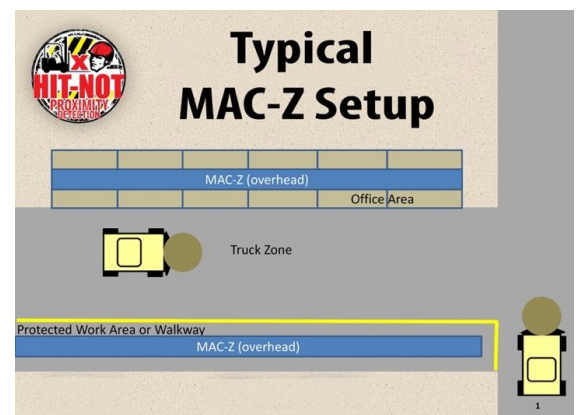

- Schedule training dates:  
Quarter 1 (2019) – April 25<sup>th</sup> thru April 26<sup>th</sup>  
Quarter 2 (2019) – May 20<sup>th</sup> thru May 21<sup>st</sup>
- Each class requires a minimum of three students

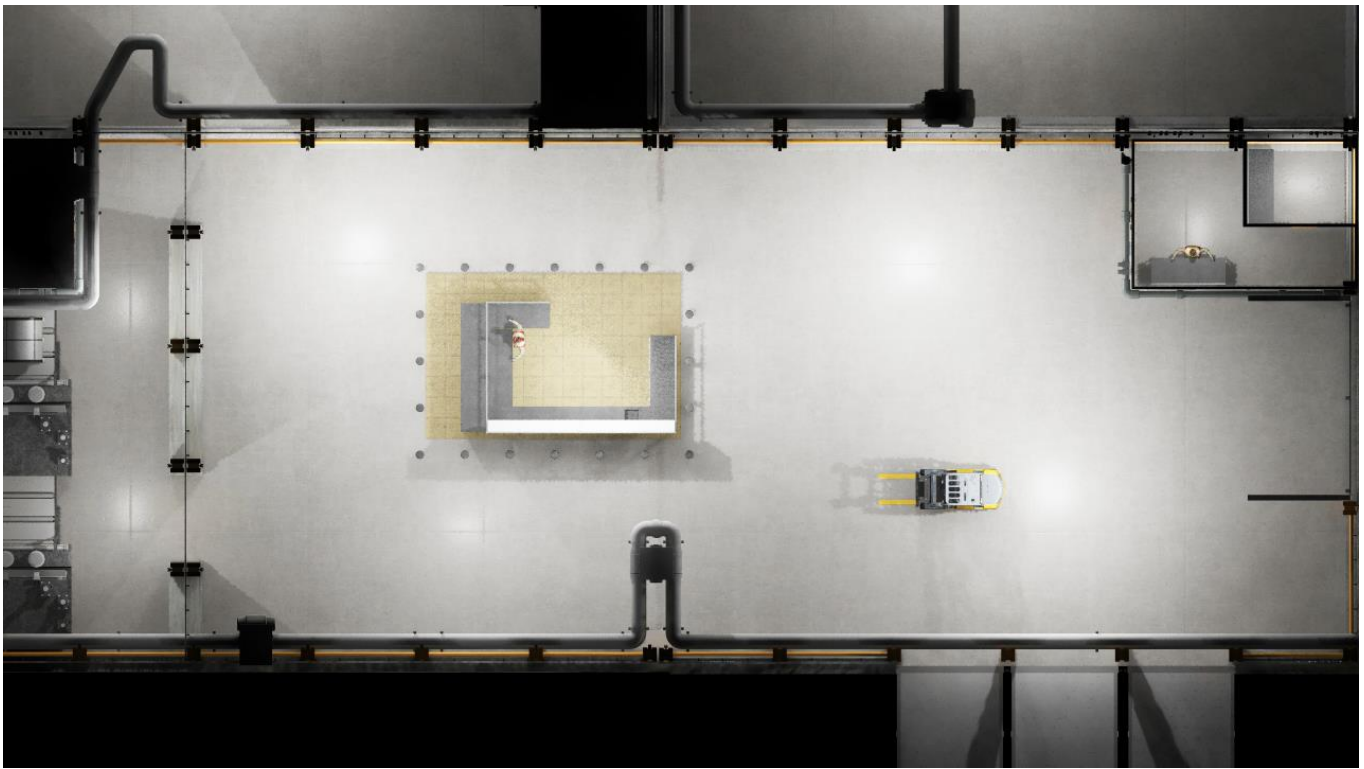

*“Detect and Protect”*

## FEATURED PRODUCT OF THE QUARTER

This quarters featured product is the MAC-Z system. The purpose of the MAC-Z is a silent zone for an assembly line, protected walkway or line of offices. Lengths ranges from 30 – 160 ft. MAC-Z are ordered and tuned at a specified length. Lengths can be changed but not without consulting with HIT-NOT. MAC-Z's allow workers wearing PADs to work in protected areas when forklifts are present without alerting. Once the workers leave the MAC-Z area, their PADs will function normally, detecting the presence of a truck and provide necessary warnings.

A MAC-Z Installation Guide, which details the equipment / personnel need for installation, is provided with each system.

3D Animation in Process

### **MARKETING MATERIAL AVAILABLE**

- Animation releasing in early April to showcase how HIT-NOT products interact with each other and how they provide total facility solutions.
- Dealer login that includes HIT-NOT installation guides and other valuable information. Need an install guide, a brochure; everything in one easy to find and download location.
