

HIT-NOT QUARTERLY NEWSLETTER

Volume 1 / Issue 2

LATEST RELEASE

Personal Alarm Device

HIT-NOT has just released an update to the Personal Alarm Device. In addition to internal improvements, a new charge circuit eliminates the need for a charger, allowing the use of a simple USB cable similar to a cell phone.

One will be included at no additional cost, and replacements can be sourced at a host of local outlets. A 10-position charge unit will be available at a low cost.

Personal Alarm Device with new Magnetic Charge Port and Charger Cable

DEALER TRAINING

New employees, just need a refresher, HIT-NOT is currently offering training for dealers at no cost at our Huntsville, Alabama facility. The two-day course includes comprehensive hands-on training, instructions for the installation and maintenance of HIT-NOT equipment, live demonstrations and a tour of the manufacturing facility.

- Schedule training dates:
Quarter 2 (2019) – May 20th thru May 21st
- Each class requires a minimum of three students

“Detect and Protect”

FEATURED PRODUCT OF THE QUARTER

This quarter’s featured product is the DC Area Monitor. Many facilities have areas that would benefit from having alerts of approaching trucks, such as intersections and pedestrian zones with blind corners.

The DC Area Monitor is the answer as it provides a 12V output for traffic lights, strobes and other lighting, plus various types of horns, when the presence of a forklift is detected.

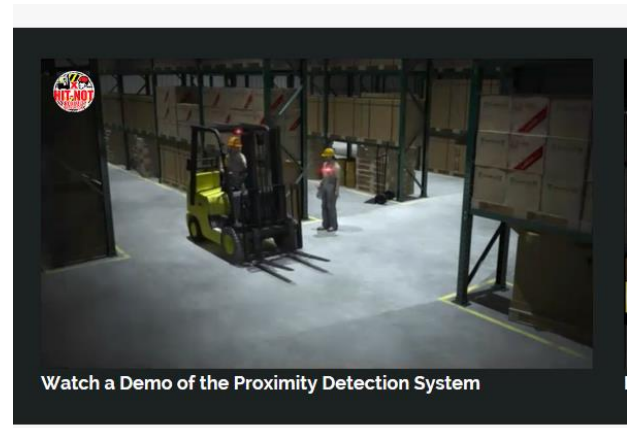

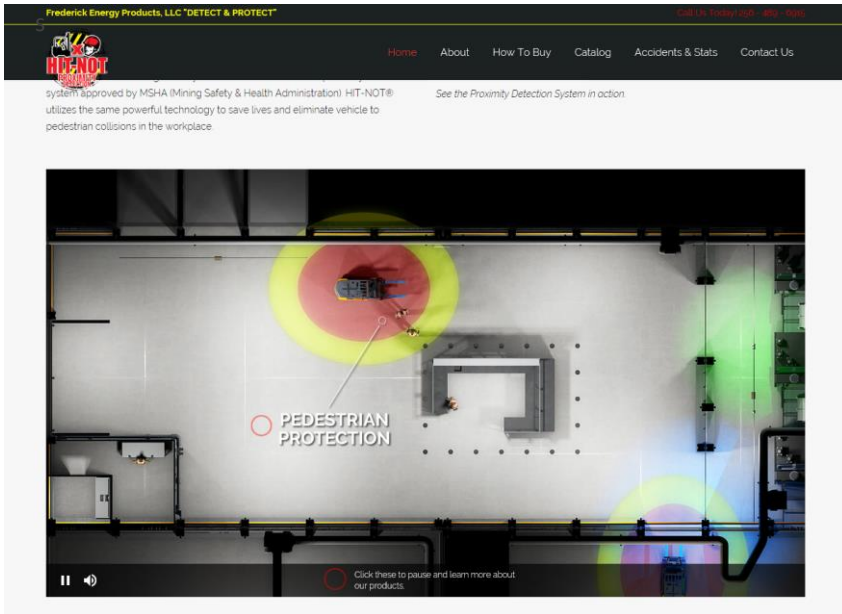

And it is simple to install and plugs in with an included power supply.

DC Area Monitor
Model Number: HN-AM-DC

HARDWARE REPAIR

Do you have HIT-NOT hardware that needs attention? We can inspect and return your hardware to factory specifications. Contact your dealer for information and to obtain a Return Merchandise Authorization number.

3D Animation Video and Interactive Facility demonstrate HIT-NOT's total facility approach.

WEBSITE UPDATES

- FEP is launching a dealer page on our webpage, www.hitnot.com
- The dealer login page will include HIT-NOT installation guides and other valuable information. Need an install guide, a brochure; everything in one easy to find and download location.
- The interactive facility is now live on our homepage.
- The "How to Buy" section showcases our dealers and their contact information. If yours is not listed or the information needs to be updated, contact us today.

TECH TIPS - PADs

- Remember, Personal Alarm Devices (PADs) are shipped with a pull tab under the battery door. It must be removed before operation.
- Do not pry battery with screw driver as it can damage unit.
- And don't forget the **PAD Checkout Station**. It is a quick, simple way to ensure your HIT-NOT Personal Alarm Device (PAD) is fully functional before use. Just drop the PAD in the holder and in less than 10 seconds the COS will verify that the PAD is working properly.

Integrated Checkout Station

Model Number: HN-ICS
