## New HIT-NOT®

**Magnetic Field Generator!**

Introducing the **SXL**

HIT-NOT® is excited to introduce our SXL Magnetic Field Generator. Designed to provide a larger field size than our standard generator, the SXL can be adjusted up to 90' Warning zone with a Type A PAD, or up to 65' Warning with a DDAC PAD.

This unit is designed for larger pieces of equipment, the SXL generator replaces our previous XL generator and has improved automotive style connectors for compatibility with standard HIT-NOT generator warning modules

## HIT-NOT® SXL Generator

- Due to End of Life of internal components, the DDAC-SXL now replaces the HN-MFG-XL
- The SXL requires 24 VDC for operation.
- Automotive style connectors, the same used on the DDAC-PDS generators, make for a durable and quick installation, plus an adaptor cable is available (SXL-Y-A) if you wish to reuse the previous generation circular connector style Warning Module and Power Cable.
- The SXL will use the same Warning Module as the DDAC-PDS-SYS, we will continue to supply the older HN-WM-LS and HN-WM-LO for the next year.
- As with the DDAC-PDS generator, the SXL has Outputs, that work in conjunction with PADs and CAMs, that can be used to slow compatible machines when proximity events occur.
- All generators, including SXL, are now Remote Event Monitoring (REM) Ready! Collect and review data of PAD-Truck interactions, usage, traffic areas and more!
- CAM alerts can now be adjusted via dip switches (located under red inserts) to fit your customer needs.

## HIT-NOT® Video Releases

To learn more about the HIT-NOT® system and how it operates, check out [HIT-NOT® Videos](#) on our website, HITNOT.com. There you will find a system overview, plus focused videos dealing with features, silent zones, structure monitors, REM, and even an install video for the generator system.

**Update on Current Supply Chain Shortages:** We appreciate your continued support and understanding in longer than normal delivery times. We are constantly monitoring and adjusting to ensure we have the products available when needed. An estimated delivery date will be supplied at time of order.  
**Most lead times are less than 3 weeks.**

## HIT-NOT® Technical Support

HIT-NOT® is available by phone, or on multiple platforms such as Teams, Zoom or WebEx, to handle technical issues or application questions.

HIT-NOT® is here to support you from initial customer contact through years of service.

## Featured Product – Bump Cap PAD (DDAC-PAD-BC)

The Bump Cap PAD was specifically designed for areas that require hard hats or other caps. It is a two-piece design that allows for the PAD to be attached to the head gear, plus the combination of a sounder and light to be mounted on the bill.

What can the Bump Cap Offer?

- Lightweight, easy to wear.
- Sounder and light in ideal position for warning notifications
- Perfect solution for areas that require hard hats or caps.
- Uses same magnetic charger as our standard PAD.

PAD Placement

Sounder / Light

## DEALER TRAINING

**ONLINE:** HIT-NOT® is now conducting online dealer training courses. This is a 3-hour course and will cover the basics of HIT-NOT, including REM and other new products.

**IN PERSON:** HIT-NOT® has resumed dealer training at our Huntsville, Alabama facility. The 1.5-day course includes comprehensive hands-on training, instructions for the installation of the HIT-NOT® equipment, and live demonstrations.

**Scheduled IN PERSON training dates:**

- October 18-19
- December 6-7

Give us a call at 256-489-6915 for details and to register your team for either online or in person training.

**Installation questions?** You can download Installation Guides by selecting the Dealer Tab at HITNOT.com, or contacting us for technical support. HITNOT.com is an excellent resource for product descriptions, why HIT-NOT®, plus a video and animation showing the system at work.

**Dealers:** Send all HIT-NOT® orders to:  
**Orders@hitnot.com**

## Dealer Information

Dealer Contact information can be found on [www.hitnot.com](http://www.hitnot.com) under the "Dealer" tab.
